ABOUT ME

Full Stack Software Engineer with 4.5+ years of experience building enterprise applications with **Angular, TypeScript, and .NET Core / C#**, with additional exposure to React and Next.js. **Proven track record on large-scale fintech platforms serving 50M+ users**, including a ~60% improvement in application load performance and the migration of a native Android sales application to a PWA for 70,000+ employees. Experienced across **REST API development, Entity Framework Core, micro frontends (Module Federation), PWA architecture, and application security (JWT, CSRF, encryption)**. Has also built **GenAI-powered internal tools** using LangChain and Gemini. Currently deepening backend and system design skills while contributing to airline cargo management systems built on .NET Core and Angular 19.

EXPERIENCE

SDE II: Revenue Technology Services (RTS), Bangalore

Nov 2025 – Present

- **Contributing to airline cargo management systems** using **.NET Core Web APIs and Angular 19**, supporting applications including Velocity, AcceleRate, and Foresight.
- **Built Angular standalone components** for real-time flight tracking, cargo allotment, and operational dashboards using **Kendo UI**, improving visibility into day-to-day operations.
- **Developed modular backend services and REST APIs**, including stored procedures on **SQL Server**, to process large cargo datasets with **Kafka** and **MongoDB** in the data pipeline.
- **Contributed to a shared component library** of reusable form controls (search, upload, validation) used across multiple applications, improving consistency and development speed.
- **Collaborated cross-functionally** with product and operations teams to streamline cargo data processing and support faster, data-driven decisions.

Senior Software Engineer: Bajaj Finserv, Bangalore

Feb 2023 – Oct 2025

- **Built Angular 19 frontends with a .NET Core / C# backend** (REST APIs, Entity Framework Core) for a consumer fintech application serving **50M+ users**, using **NgRx** for state management.
- **Improved homepage and application load performance by ~60%** through lazy loading, Angular route reuse strategy, API caching, **IndexedDB**-based client-side caching, and rendering optimizations.
- **Led the migration of the SalesOne native Android application to a PWA** for **70,000+ sales employees**, engineering a two-way **PWA ↔ Android/WebView JavaScript bridge** for seamless interop.
- **Delivered core product modules** including Gold Loan, Document Centre, IRCTC, FD services, and Rewards, alongside internal tools such as the **Engineering CRM, Employee360, and API Monitoring** dashboards.
- **Implemented real-time features** using **WebSockets and SignalR**, and adopted **Module Federation / micro frontends** to scale the frontend architecture across teams.
- **Strengthened application security** with **JWT authentication, encryption, CSRF protection, and SQL injection prevention** across API integrations.
- **Built an AI-powered internal office policy assistant** using **Gemini, LangChain, and RAG** with streaming socket responses, and a **TensorFlow.js**-based toxicity detection tool.
- **Set up CI/CD pipelines on Azure**, reducing deployment time by ~40%.

Full-stack Developer: epikindifi, Chennai

Jan 2022 – Nov 2022

- **Built a banking application for Yoma Bank** using **Angular and React** frontends with a **Node.js/Express and .NET Core** backend.

- **Developed a React Native mobile app and Angular web application in TypeScript**, sharing reactive forms and validation logic across platforms.
- **Created reusable Angular and React component libraries** to maintain consistent design patterns across web and mobile.
- **Built secure APIs** using Node.js/Express and .NET Core with **Entity Framework**, implementing **JWT authentication** and custom middleware.

AWARDS AND ACHIEVEMENTS

- **Spot Award – Innovative Star, Prodigy Award, Heroes Award, and Kudos Award** at Bajaj Finserv for full-stack Angular/.NET delivery and frontend innovation.
- **CTF Finalist** – Top 30 in the Bajaj Group cybersecurity challenge (web security focus).
- **1st Prize – Duothon Hackathon** (full-stack development); **3rd Prize – 7-Minute Plank Challenge**.

SKILLS

- **Frontend:** Angular (v2–19), React, Next.js, TypeScript, JavaScript, RxJS, NgRx
- **Backend:** .NET Core, C#, ASP.NET Core, Entity Framework / EF Core, Node.js, Express.js, REST APIs
- **Database:** SQL Server, MongoDB
- **Cloud & DevOps:** Azure, Docker, CI/CD, Git
- **Architecture:** PWA, WebSockets, SignalR, Module Federation / Micro Frontends
- **Security:** JWT, OAuth, CSRF Protection, Encryption
- **AI/GenAI:** LangChain, RAG, Gemini, TensorFlow.js
- **Styling:** Tailwind CSS, SCSS

KEY PROJECTS / INITIATIVES

- **ODC Dashboard** – AI-powered application with React/Angular frontends and a .NET Core backend featuring a LangChain + Gemini chatbot.
- **RAG AI Assistant** – Next.js 14 and Angular frontends powered by a LangChain RAG pipeline.
- **PipeCode LMS** – Open-source LMS with React and Angular micro-frontends on a .NET Core microservices architecture.
- **Roo Code (Open Source)** – Contributed to Roo Code, a GitHub Copilot-like tool built with Next.js, TypeScript, and React; implemented Mermaid diagram rendering with retry mechanisms and error handling.

EDUCATION

VIT University, Vellore

2018 – 2022

B.Tech in Computer Science and Engineering, Specialization: Information Security | CGPA: 8.26/10

CERTIFICATIONS

- **React Complete Guide** – Udemy
- **Angular Complete Guide** – Udemy
- **Next.js 14 Masterclass** – Udemy
- **.NET Core Web Development** – Microsoft Learn
- **Full Stack Development** – EC-Council

LANGUAGES

- English – Professional
- Telugu – Native
- Hindi – Intermediate
